Maria Dolenko

Product-minded professional | SEO, Research & SaaS Web Systems

mashadolenko@gmail.com | dolenkoma.github.io | Marbella, Spain
Open to Málaga office/hybrid | Remote worldwide | Authorized to work in Spain

PROFESSIONAL SUMMARY

Product-minded professional with 8 years of experience in SEO, user intent, competitor research, and digital growth, plus 3+ years owning and improving a SaaS web system. I translate ambiguous needs into clear user flows, requirements, reusable systems, QA plans, and practical delivery steps. Through Agromega and Luna, I am deepening hands-on experience in product discovery, feature scoping, backlog structure, data logic, and AI-assisted implementation. I am looking to contribute strong research, structured thinking, ownership, and execution within a product team.

PRODUCT PROJECTS

Agromega - Independent Product Project

Product discovery, UX logic & AI-assisted delivery | Apr 2026-present

- Defined the core user problem, MVP scope, business processes, user flows, information hierarchy, and data logic for a plant diary and planner.
- Designed how information is collected and presented across dashboards, diary cards, care history, plant profiles, filters, and active/archive states.
- Structured features and edge cases into clear implementation tasks, then reviewed behavior and usability through iterative QA.
- Guided AI-assisted implementation through structured prompts, task decomposition, testing, and product-level decision-making.

Luna - Independent Product Project

Mobile-first product concept, UX logic & AI-assisted delivery | Jul 2026-present

- Created a cycle-life calendar concept from scratch, defining user scenarios, feature scope, interface states, backlog, and data relationships.
- Designed daily planning, cycle phases, mood and water tracking, nutrition flows, fasting timer, and personalized content behavior.
- Focused on reducing cognitive load and presenting sensitive health-related information with calm, clear, and non-judgmental UX.
- Used AI-assisted development to prototype, inspect generated code, test flows, and refine product logic while retaining final ownership of decisions.

PROFESSIONAL EXPERIENCE

Wizer - Web Product / CMS Specialist

Cybersecurity education SaaS | Remote | 2022-2025

- Owned and evolved the HubSpot-based marketing website in a remote international SaaS environment.
- Translated recurring marketing, content, design, and SEO needs into reusable patterns and implementation requirements.
- Built a custom HubSpot theme and around 30 reusable modules; supported around 50 pages and templates.
- Enabled content managers to publish and update pages independently, reducing routine dependency on developers.
- Managed implementation, responsive behavior, SEO requirements, analytics checks, QA, issue resolution, and ongoing iteration while collaborating with marketing, content, and design.

PROFESSIONAL EXPERIENCE - CONTINUED

SEO Specialist / Senior SEO Specialist

In-house & freelance projects | Ukraine / Remote | 2015-2022

- Progressed from Junior to Senior SEO Specialist across e-commerce, niche, and highly competitive projects, including iGaming.
- Led user-intent and competitor research, semantic analysis, content planning, technical audits, on-page optimization, and growth strategy.
- Used Google Analytics and Google Search Console to evaluate traffic, CTR, impressions, rankings, landing-page performance, and content effectiveness.
- Translated research and analytics into concrete actions for content, site structure, technical fixes, internal linking, and landing-page optimization.
- Built scalable website and content structures focused on organic growth and clearer user journeys.
- Coordinated work within SEO teams and communicated priorities, findings, and recommendations to colleagues and stakeholders.
