Maria Dolenko

Product Manager

mashadolenko@gmail.com | dolenkoma.github.io

Open to Málaga office/hybrid | Remote worldwide

PROFESSIONAL SUMMARY

I have nearly eight years of experience in SEO, working across different industries and projects of various sizes. In my most recent role, I spent three years at a cybersecurity SaaS company, where I managed the HubSpot CMS and the company website, coordinating technical updates with marketing, content, and design teams.

Over time, I became increasingly interested in the problems behind the requests: not only how to improve search performance or implement a website change, but why it was needed, how it affected users, and what else could make the product better. This curiosity is leading me toward product-focused roles, where I can build on my SEO and web experience, contribute to broader product challenges, and continue developing in product work.

PROFESSIONAL EXPERIENCE

Wizer - Web Product / CMS Specialist

Cybersecurity education SaaS | Remote | 2022-2025

- Managed the company's HubSpot CMS website, building and maintaining landing pages of varying complexity and ensuring responsive behavior.
- Developed reusable custom modules to help the team create and update pages more consistently and with less reliance on developers.
- Implemented SEO requirements, resolved website issues, and checked updates for quality and responsive behavior.
- Worked day to day with content, marketing, and design teams, turning their needs into website updates.
- Contributed to the development of a system for live CTF challenges for developers.

Tools & technologies: HubSpot CMS, HubL, HTML, CSS, JavaScript, Figma, Adobe XD, Trello, VS Code

Core skills: CMS ownership, landing-page development, reusable module development, responsive implementation, SEO, website troubleshooting, QA, cross-functional collaboration, task tracking, Kanban

SEO Specialist / SEO Manager

In-house and freelance projects | Ukraine / Remote | 2015-2022

- Progressed from Junior to Middle+ SEO Specialist, taking on broader responsibility for strategy, execution, and team coordination.
- Worked across companies, startups, and freelance projects, from large e-commerce websites to smaller, fast-moving businesses.
- Delivered SEO work for large e-commerce projects, including Foxtrot and Citrus, as well as projects in education, digital signage, and iGaming.
- Researched competitors and search demand, planned content, conducted technical audits, and improved on-page SEO and internal linking.
- Turned research and performance data into practical SEO recommendations and growth plans.
- Coordinated SEO work within teams, set priorities, and shared findings and recommendations with colleagues and stakeholders.

Tools & technologies: Google Search Console, Google Analytics, Ahrefs, Semrush, Screaming Frog, WordPress, Jira, HTML, CSS

Core skills: Keyword and competitor research, semantic analysis, content planning, technical SEO, on-page optimization, internal linking, backlink strategy, SEO strategy, team coordination and management

Industries: E-commerce, iGaming, education, digital signage

Markets: Ukraine, the US, Asian and other international markets

PET PROJECTS

Agromega - Product Owner

January 2026-Present

- Own the development of Agromega, an agriculture-focused plant diary and planner, from the initial idea through the current live product.
- Define product workflows, feature scope, user flows, and data logic.
- Design how information is collected and presented across the dashboard, plant diaries, care history, plant profiles, filters, and plant statuses.
- Guide AI-assisted development with Codex by breaking features into tasks, writing structured prompts, reviewing implementations, testing functionality, and refining the product.
- Manage the project's SEO and analytics, and identify opportunities for future product improvements.

Tools & technologies: Django CMS, Codex, Google Analytics, SEO tools, GitHub, VS Code

Core skills: Product ownership, workflow design, feature scoping, user-flow analysis, data logic, task decomposition, AI-assisted development, testing and iteration, SEO, responsive layout

Luna - Product Owner

MVP development | July 2026-Present

- Created the concept for a mobile-first cycle and wellbeing planning product from the ground up.
- Defined the core user scenarios, product workflows, and interactions.
- Designed how users enter information and how data is organized and used across the product.
- Developed the UX/UI structure and am currently building the MVP with AI-assisted development.

Tools & technologies: React, Next.js, TypeScript, CSS, Cloudflare SQL, Codex

Core skills: Product discovery, user-flow design, workflow mapping, data structure, UX/UI design, MVP development, AI-assisted implementation
